

GLASS LENSES

AccuLab is one of the few lens labs in the country that still offers glass lenses—a material known for its amazing benefits. Glass lenses provide exceptional clarity and durability, offering excellent light transmission while reducing distortions and aberrations.

We carry a wide range of glass lenses, including single vision, multifocals, round segs, double segs, progressives, photochromic, polarized, and x-ray glass. We also offer tints and anti-reflective coatings to customize your lenses to your needs.
